

Innovation Changes Everything

QBSI

A Xerox Company

About Us

QBSI, a Xerox company, focuses on being a consistent and reliable partner. As one of the most respected consultancy firms in the area, our business is uniquely positioned to help companies understand true cost breakdown, asset deployment, usage patterns and volumes along with the development of sustainable working practices and continuous business process improvement. We have successfully led Fortune 500 companies as well as small organizations – in every industry from healthcare to education and manufacturing – to achieve better financial results, improve operational efficiency and reduce environmental impact.

QBSI, a Xerox company, was acquired by Global Imaging Systems, www.global-imaging.com (headquartered in Tampa, Florida), in 1997. Global Imaging Systems operates 226 active units across the country with 4,500 employees serving 150,000+ customers.

Because of our continued success year after year, in 2007, Global Imaging Systems and all of its operating units across the country became a wholly owned subsidiary of Xerox Corporation (NYSE: XRX) and added Xerox document technology and services to its portfolio. Maintaining our local focus and independent approach to sales, service and customer support, while adding the benefits of the Xerox Corporation and its product line, has created enormous benefits to our customer base.

QBSI360^o™ Assessment

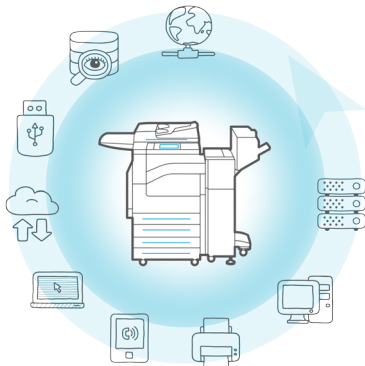

QBSI360^o™ is a revolutionary assessment methodology that measures the core areas required to achieve true optimization. It is a multi-source approach that delivers a comprehensive snapshot, providing clear visibility into each of seven core business areas. Our 360 App and Mapping tools help to deliver concrete, actionable guidelines for complete alignment of all technology and business process initiatives.

*Understand Culture • Inventory Technology
Analyze Usage Capture Costs • Review Workflow
Examine Processes • Study Sustainability*

Sustainability

We are committed to supporting every sustainable initiative. We stand behind all efforts of Xerox and our other partners to help customers reduce office waste, reduce the use of paper, and manage equipment at end of life. Together with our employees, suppliers and customers, we strive to maintain the highest standard to preserve our environment.

- Reduce energy use to protect our climate
- Prevent and manage waste with Xerox solid ink technology
- Preserve clean air and clean water by minimizing toxic materials and heavy metals
- Preserve biodiversity and the world's forests by reducing paper consumption through the use of innovative software solutions.
